

Prepare your 2016 cereal crops with the right seed dressing

- Low quality seed shows up as crops with poor early vigour
- Seed from 2015 crops will be small grained- check with us about conducting 1000 seed weights to calculate the seeding rate accurately- we could save you money
- Seed treatments should be selected for each variety with disease management in mind
- Small seed of short coleoptile varieties can be severely affected by pre-emergent herbicides and Baytan- seek advice

	Smut (W, B)	Bunt (W, B)	Stripe Rust (W)	Powdery Mildew, Scald (B)	Rhizoctonia	Zinc deficiency	Aphids	Cost/tonne	Cost/ha (60kg/ha)
Raxil T	100	150						\$18-27	\$1.08-1.62
Baytan T, Phoenix	100	100	150	150				\$21-31.50	\$1.26-1.89
Vincit Zinc	400	400				400		\$22	\$1.32
Evergol Prime	40-80	40-80			40-80			\$58-116	\$3.48-6.96
Gaicho, Emerge							120-240	\$42-84	\$2.52-5.04
Twin zinc						200-400		\$21-42	\$1.26-2.52

Recommended seed treatment products- application rate mL/100kg seed

Top Tip: Do support stripe rust susceptible varieties such as **Mace** with flutriafol amended fertiliser rather than triadimenol seed products such as Baytan/ Phoenix-

Contact Swan Hill Stockfeeds for advice on selecting the right seed dressing, dressing combinations, as well as conducting seed counts. Stocks available now.
